

Improvement proposal - new ideas - other improvement - executions

New technical and other at solution for elevated competitiveness, prosperity and profit

Betterment is any change, that amp up availability and uniqueness firms and its product or of services for her client and bears effects in form elevated bilk out of and profit, an increase in of a number of and loyalties client and an increase in share in the market.

Improving is law suit, benefiting local knowledge and solving above all local difficulties. as contrasted to innovations insists executions short time (for weeks) and have an statistically as far as 90% fruitfulness.

To implementation improvement proposal and by other betterment can used how attainment expensive examination and developments, such all sorts of brainchild and improvement proposal, practicals implementation elfin other larger betterment and change, part adaptation or else harnessing patents, licence under a patent and the like.

Advantage to take advantages timeous solution innovating and innovation and carry off:

- economy costs / material, of raw materials, beef, personnel concerned, laundry, of transport, abbreviation time, oversimplification and streamlining technological processes of fabrication, distribution and consumption,
- gain enhancement / bilk out of, of a number of client and users to, order, breeding, assortment, exported goods, quality, making, utility also esthetic values product, safety, environmental friendliness and the like,
- solution trouble and difficulties / deterrence likely hazards and imperilment losses fruit, abridgment or risk elimination and losses actual location or decommissioning from market,
- other advantages / an increase in competitiveness, lead ago competition, higher prosperity and cachet firms, bigger hold over market, decommissioning competition from market, global increase in volume and the like.

All's can be do and work out better off, cheaply, more plainly, faster and effectively now

Using of my original ideas, vision and know-how can solve almost every problem, because nothing is perfect and even the current news is already out of date and can be improved.

Advantage those offers is contingency combinations any more each other coherent acitivities and their contemporaneous implementation.

All these activities can be realized in relatively short time (according theirs costingness), during which time costs are only broken number that, what can be by this one acitivities carry off.
