

# **Opposition - opposition procedure – opponent**

## **Opposition and the opposition procedure, its meaning, purpose and goal**

Opposition is the opposition procedure, in which the opponents of the independent assessment of projects, solutions, investments and so on. The motivation and the goal is to reveal the shortcomings adversarial objective to ensure accuracy, optimization and elimination of subjective influences the authors project or solution that usually projects and any other activity in its initial form contains.

Contribution opponencies is undeniable and growing the meaning and value of the project, activity or amount of investment. Also, in the case of uncertainty, the accuracy of solution provides oponent independent and impartial view outside and constructive criticism.

## **Implementation adversarial in practice**

Opposition is based on the discussion, the contracting authority, author and advocate of the project convinces the opponent (or several independent opponents) on the accuracy of its solutions and processes, and the opponent on the other hand tries to uncover the weaknesses of the project, specific vulnerabilities, errors, subjective approaches can be scenarios, including an outline of the worst possible scenarios. This allows the contracting authority timely preparation of responses to various development alternatives and possible extreme situations.

The most effective form of critical reviews is teamwork, where several opponents as stakeholder experts independently examine projects and their parts and together seek to eliminate all hidden weaknesses and risks that could change in the practical realization of mind.

Constructive opposition of several opponents increases primarily objectivity and significantly contributes to the quality of the project revealing potential risks, removing hidden errors, weaknesses and possible subsequent elimination of failure and loss.

## **The opponent and the opposing**

The opponent must not be an employee of the contracting authority, collaborator on the project, the person has a family relationship with the contracting entity, or person in an antagonistic relationship with the contracting entity adversarial. The opponent should have the ability to understand the client environment or authors of the project or the solution to the issue.

Readers make opposition to the project report in writing on the agreed date and the reasons for its position with sufficient information value as specified. After successfully completing all adjustments authors of the project would get the final form of the project to go through the opponent and any changes made to approve the proposals. It is then entirely up to the authors,

investors and project promoters, whether opponents of the proposed recommendations and modifications observed.

Opponency organized by the sponsor and also pays all costs associated with it. It is also responsible for the timely preparation of evaluations, including the delivery of written documents opponent (opponents). For more adversarial opponents conclusions of the peer review board approves composed of the participating opponents vote.
