

Service - installations - assembly operations - adaptation - repairs

Service activity as part of innovational of the process and as special service activity

Servis by me designed and ex post apparatus, perhaps even by other apparatus according to contract, especially out of the ordinary or commonly beyond repair apparatus, which comprises any apparatus engineering character of in manufacturing order also consumable province, eg. technological, machine and other apparatus or amenity, appliances, installation and appliances of all kinds, as for example aged, fresh, foreign, actuated by power, electric, ancient, atypical, specific to, special, curious, matchless or rare.

The advantage is the possibility of simultaneous use of innovative activities offered to technical improvement or improvement of device parameters and its modifications, such as performance, power, capacity, speed, efficiency, energy consumption, etc. according to the interest of the client and his needs. Implementation of these activities is possible only after prior consultation and price and terms are determined by agreement.

Basic activities:

installations, assembly operations, disassembling, adaptation, repairs, bringing up to date and servis by me designed and ex post apparatus, eventually any other out of the ordinary or commonly beyond repair apparatus engineering character of, which is commonplace hardware or capacities unmakeable.

Additional activities:

repair, renovation, restoration, replacement, adjustment, adjustment, inspection, monitoring, assessment, safety, security, protection, recovery operation or commissioning unusual or commonly repairable equipment, as well as cooperation, coordination, organization, project development, promotion, implementation plan and other related activities.

What this usually does not work and what does not apply

This action is not a substitute activity provided by a commercially available service network of artisans and ordinary repair, or activity provided by the manufacturer and dealer of technical equipment in the performance of their duties warranty or post-warranty service.

Shall also not apply to highly sophisticated and specific technological equipment, instruments and equipment, or where the real cost of repair would be higher than the price of new equipment, which is especially true for the less valuable equipment, apparatus or appliance.

Conditionals and reality means

Demonstrate more exacting work technical or expert character of, eventually work bigger range resolves bringer (eg. check on amenable curious call sheet and law, welding, handling, carrying etc.)

Provider can not guarantee the objective causes 100 % success rate in the absence or unavailability of the original or other suitable parts and materials needed anything irreplaceable, plans and technical documentation, or because irreparability equipment for a considerable degree of damage or devastation device.

*

Advantage those offers is contingency combinations any more each other coherent activities and their contemporaneous implementation. All these activities can be realized in relatively short time (according their costingness), during which time costs are only broken number that, what can be by this one activities carry off.
