

# **Why official science (provisionally) recognize esoterics**

## **For current science can not exist what she does not have to ...**

These effects and happening are not need be able account for and argue scientifically, because be enacted beyond the pale human knowledge, which is limited his contingency and by of limited levels knowledge actual of science is thus an absolutely out of his comprehending. Fundamental infiltration is, that these, for us "marvelous" goings, processes and happening in practice under certain condition be functional and has some already of thousands of flight bringing in demonstrable and concrete findings.

Science has already shown that time is plastic, the space is curved, and the spirit of its own energy, but the main problem of why science does not recognize esotericism and especially parapsychology (for example, various real and inexplicable mysterious abilities, phenomena and phenomena) is the impossibility of repeating something at any time in the laboratory with 100% reliability and also that it can not be measured (it does not yet know).

If the assumptions, assertions and evidence of scientists, physicists, and contemporary sciences were correct, as the vast majority of them claim, the existence and incidence of parapsychological and extra-mental (ESP) phenomena and manifestations should never occur. At the same time, these phenomena and manifestations have been tested many times in the past and scientifically confirmed, they are demonstrably an integral part of our lives and our existence, they are therefore the nature of man.

## **The distinction between the past, the present and the future must be understood as an illusion (Albert Einstein)**

The universe is not space and time bounded. The future somehow exists already and can cast its shadow into the past. People, things, and events leave their traces of time and space.

Man has undoubtedly the power to control time and space, or to use them. People are able to receive news from tomorrow, or they can focus their views on the future or the past. It is possible by simple exercises to mobilize the superhuman forces.

## Main areas esotericism

### Parapsychology and ESP

**Telepathy, telegnosis, telestesion, imagination, transformation, telekinesis, teleporting, levitation, bilocacion, dematerialisation, materialisation, psychical therapy, karma, fate, incarnation, reincarnation and astral journeyings.**

Parapsychology (otherwise also psychotronics, metapsychics, ESP) is branch upon sensory effect, dealing with abnormal mental ability to (as for example amount carried over information, manipulation with mass, therapy, migrations air hose valve and the like), by non at present by that time scientifically explainable and demonstrable. ESP = Extra-Sensory Perception.
